

NHS Trust 2013/14 development priorities template

The planning process will identify the support that NHS Trusts may require to achieve their goals. Organisations will have access to a wide range of potential support in the new system, from the NHS Leadership Academy, the new Improvement Body clinical networks and senates, and the NHS TDA itself. To establish a fuller and clearer understanding of the support each NHS Trust would find most beneficial we are asking each Trust to identify a small number (3-6) of high priority support and development needs. These might include things the NHS TDA can offer directly, such as networking, peer support and access to expertise; or they may include things that the NHS TDA can help Trusts to access elsewhere in the system. Please complete the template below to identify these needs.

No.	Development Priority
1	Developing effective Board and key stakeholder relationships eg Council of Governors; CCGs.
2	Leadership and management development to support service line management and the implementation of the Trust's Service Transformation Programme.
3	Enhancing commercial acumen and marketing expertise within the new health care commissioner and provider landscape.
