### 1. EXECUTIVE SUMMARY

- 1.1 At 31 March 2015 only one doctor has a prescribed connection with the Trust, being wholly employed by Yorkshire Ambulance Service NHS Trust (YAS); he is the Executive Director of Operations. The Trust is a Designated Body for this doctor. The Executive Medical Director, also wholly employed by the Trust, was appointed the Responsible Officer for YAS in January 2015 so his prescribed connection now lies with NHS England (North). Both doctors have completed annual appraisals, maintained licences to practice, and successfully revalidated in 2013-14.
- 1.2 A further six doctors are employed by the Trust on part time contracts or open-ended secondments. These doctors' other employers are their Designated Body and, whilst appraisal and PDR by YAS contributes to their overall appraisal for revalidation purposes, they do not have a prescribed connection with the Trust.
- 1.3 The Trust also holds honorary contracts with 20 further doctors who are members of YAS BASICS. The activity reports produced by the Trust's Medical Governance Lead are available to these doctors to help inform their appraisal at their employing trusts.

### 2. PURPOSE

2.1 There is a similar need to provide assurance to patients, the public, the service and the profession that the systems and processes underpinning revalidation are in place and are working effectively, to ensure that every licensed doctor's fitness to practise is monitored and assessed on a regular basis. The Annual Report serves as the vehicle to provide this assurance to YAS Trust Board.

### 3. BACKGROUND

- 3.1 Medical Revalidation was launched in 2012 to strengthen the way that doctors are regulated, with the aim of improving the quality of care provided to patients, improving patient safety and increasing public trust and confidence in the medical system.
- 3.2 Provider organisations have a statutory duty to support their Responsible Officers in discharging their duties under the Responsible Officer Regulations<sup>1</sup> and it is expected that Trust Board will oversee compliance by:
  - monitoring the frequency and quality of medical appraisals in their organisations;
  - checking there are effective systems in place for monitoring the conduct and performance of their doctors;
  - confirming that feedback from patients is sought periodically so that their

<sup>&</sup>lt;sup>1</sup> The Medical Profession (Responsible Officers) Regulations, 2010 as amended in 2013' and 'The General Medical Council (Licence to Practise and Revalidation) Regulations Order of Council 2012'

views can inform the appraisal and revalidation process for their doctors;

 ensuring that appropriate pre-employment background checks (including pre-engagement for Locums) are carried out to ensure that medical practitioners have qualifications and experience appropriate to the work performed.

#### 4. GOVERNANCE ARRANGEMENTS

- 4.1 Although the Trust employs eight doctors, and has honorary contracts with 20 more as members of the YAS BASICS scheme, YAS is only the main employer for two these; they are the Executive Medical Director and the Executive Director of Operations.
- 4.2 As the Trust employs doctors it is registered as a Designated Body with NHS England. All Designated Bodies must have a Responsible Officer; for YAS the Responsible Officer is Dr Julian Mark, the Executive Medical Director.
- 4.3 As one of the two substantively employed doctors is the Responsible Officer and therefore has a prescribed connection to NHS England, the Trust only has one doctor with a Prescribed Connection.
- 4.4 The remaining doctors employed by the Trust are on permanent secondment to YAS and the overarching responsibility for their medical appraisal and revalidation lies with their own Designated Bodies and Responsible Officers. YAS has a responsibility to help inform doctors about their activity and performance whilst working for YAS and this is satisfied by two means. Clinical performance is reviewed by the Medical Governance Lead and reports are available to individual clinicians. Managerial performance is reviewed through the Trust's Performance Development Review (PDR) process and individual doctors incorporate these into their annual appraisals.
- 4.5 The major trauma desk paramedic reviews all trauma incidents within the YAS area in real time, and will arrange for deployment of immediate care doctors to appropriate incidents. This attendance is logged on the trauma desk spreadsheet, which records all trauma incidents. When the doctor is clear from the incident, the trauma desk will record any advanced interventions by that doctor, any adverse outcomes or complications, whether the doctor accompanied the patient to hospital, and the doctor's time on scene.
- 4.6 The Medical Governance Lead reviews the trauma log on a weekly basis, and reviews PRFs and CAD notes of incidents where there have been advanced interventions made, and if required will ask for further information from the clinicians involved, ensuring appropriate actions have been made, and relevant pathways have been followed.
- 4.7 If rapid sequence induction of anaesthesia is performed, a dedicated audit form must be completed and returned to the Medical Governance Lead for review to ensure the intervention was appropriate, and protocol has been followed. If this doctor performed the RSI, he will complete the audit form and then forward to another suitably experienced doctor employed by the Trust for review.

4.8 Summaries of immediate care doctor activity are collated on a monthly basis allowing review of both YAS immediate care activity, as well as individual doctor's activity and interventions. The monthly review is further collated into a larger annual review.

#### 4.9 Policy and Guidance

Guidance on medical appraisal is incorporated into the wider draft Medical Governance Policy awaiting approval by the Trust's Senior Management Group (SMG).

### 5. MEDICAL APPRAISAL

#### 5.1 Appraisal and Revalidation Performance Data

Of the two doctors directly substantively employed by the Trust, both successfully completed medical appraisals in 2013-14.

#### 5.2 Appraisers

Dr Andrew Pountney, YAS Medical Governance Lead, is the only recognised medical appraiser in the Trust. He is substantively employed by Mid Yorkshire Hospitals NHS Trust, seconded to YAS, and receives support and training through his substantive employer.

#### 5.3 Quality Assurance

YAS doctors use the Model Appraisal Guide (MAG) published by the General Medical Council (GMC)

Since the YAS BASICS governance process was made more robust (May 2013), there have been no adverse clinical incidents or complaints received.

There have been complex cases, and these have resulted in case reviews and discussion with clinicians involved, both to offer support after challenging circumstances and also to review clinical practice and to identify any lessons which could be learned.

There have been several YAS BASICS process improvements since January 2013, when the medical governance lead post was instigated:

- It was identified that tasking of YAS BASICS doctors could be haphazard, and as a result the decision of whether or not to deploy a doctor has been moved from the alternative response desk despatcher, to the major trauma desk paramedic.
- A gap in provision of immediate care cover was been identified in South Yorkshire, and as a result two appropriately trained and experienced doctors from this area have been recruited into YAS BASICS, giving us better coverage of the whole YAS footprint.

- Robust protocols and audit trails are now in place for the more complex medical interventions (RSI and PALM), ensuring these are carried out appropriately, and safely to maximise patient safety and minimise risk. Furthermore, cases where advanced interventions have been performed (or omitted) are reviewed by the Medical Governance Lead, to ensure appropriate clinical practice by YAS BASICS doctors.
- There is now an annual appraisal process whereby YAS BASICS doctors are required to submit information for the preceding year, including continual professional development activity and immediate care activity, as well as to identify areas for development for the forthcoming year. This is reviewed by to ensure the YAS BASICS doctors are appropriately trained and remain up to date. Recommendations regarding further training are made as required, and support is offered where needed. To support this process YAS BASICS doctors are provided with a summary of their activity (incidents attended, interventions performed and any critical events or complaints). This will be used by the doctors to inform their annual appraisal, since they are obliged to declare their pre-hospital practice as part of the appraisal process.
- Following some confusion around the tasking of (and requests for, by YAS BASICS doctors) alternative air resources (notably RAF search and rescue, and police), and hospital medical teams, simple flowcharts have been developed for use in EOC to ensure these resources are deployed appropriately, and only after agreement from the Medical Incident Commander.

(See **Appendix B**; Quality assurance audit of appraisal inputs and outputs)

#### 5.4 Access, security and confidentiality

No issues reported

### 5.5 Clinical Governance

Individual doctors will receive an annual activity summary of their work with YAS BASICS, including number of incidents attended, number of patients attended, advanced (i.e. beyond the scope of a paramedic) interventions made, adverse outcomes and complaints. The practitioner will use this to inform their annual appraisal process with their employer.

### 6 REVALIDATION RECOMMENDATIONS

No recommendations for revalidation were made in 2014-15.

See Appendix C; Audit of revalidation recommendations

### 7 RECRUITMENT AND ENGAGEMENT BACKGROUND CHECKS

Including pre and post-employment checks;

Checks on locums;

### See Appendix E

Audit of recruitment and engagement background.

### 8 MONITORING PERFORMANCE

Performance is monitored through the annual appraisal process conducted by an approved appraiser. Reflective practice, including ad hoc debrief, forms part of the doctors' appraisal portfolios.

### 9 RESPONDING TO CONCERNS AND REMEDIATION

No concerns were identified.

### 10 RISKS AND ISSUES

One of the components of enhanced appraisal is the collection of patient feedback on an individual doctor's performance. This can be particularly challenging in the pre-hospital environment. It is likely that collection of patient feedback will remain an issue and a risk to future revalidation.

### 11 CORRECTIVE ACTIONS, IMPROVEMENT PLAN AND NEXT STEPS

None required.

### **12 RECOMMENDATIONS**

- 12.1 The Board is recommended to accept the report, understanding that this document, the Statement of Compliance and the Annual Audit will be shared with the NHS England higher level Responsible Officer.
- 12.2 The Board is recommended to approve the Statement of Compliance (at **Appendix F**) confirming that the Trust, as a Designated Body, is in compliance with the regulations.

### **Designated Body Statement of Compliance**

The board of Yorkshire Ambulance Service NHS Trust has carried out and submitted an annual organisational audit (AOA) of its compliance with The Medical Profession (Responsible Officers) Regulations 2010 (as amended in 2013) and can confirm that:

1. A licensed medical practitioner with appropriate training and suitable capacity has been nominated or appointed as a responsible officer;

Comments: Dr Julian Mark, from January 2015.

2. An accurate record of all licensed medical practitioners with a prescribed connection to the designated body is maintained;

Comments:

3. There are sufficient numbers of trained appraisers to carry out annual medical appraisals for all licensed medical practitioners;

Comments:

4. Medical appraisers participate in ongoing performance review and training / development activities, to include peer review and calibration of professional judgements (Quality Assurance of Medical Appraisers or equivalent);

Comments:

5. All licensed medical practitioners<sup>2</sup> either have an annual appraisal in keeping with GMC requirements (MAG or equivalent) or, where this does not occur, there is full understanding of the reasons why and suitable action taken;

<sup>&</sup>lt;sup>2</sup> Doctors with a prescribed connection to the designated body on the date of reporting.

#### Comments:

6. There are effective systems in place for monitoring the conduct and performance of all licensed medical practitioners<sup>1</sup>, which includes [but is not limited to] monitoring: in-house training, clinical outcomes data, significant events, complaints, and feedback from patients and colleagues, ensuring that information about these is provided for doctors to include at their appraisal;

Comments:

7. There is a process established for responding to concerns about any licensed medical practitioners<sup>1</sup> fitness to practise;

Comments:

8. There is a process for obtaining and sharing information of note about any licensed medical practitioners' fitness to practise between this organisation's responsible officer and other responsible officers (or persons with appropriate governance responsibility) in other places where licensed medical practitioners work;

Comments:

9. The appropriate pre-employment background checks (including pre-engagement for Locums) are carried out to ensure that all licenced medical practitioners<sup>3</sup> have qualifications and experience appropriate to the work performed; and

Comments:

10. A development plan is in place that addresses any identified weaknesses or gaps in compliance to the regulations.

Comments:

<sup>&</sup>lt;sup>3</sup> Doctors with a prescribed connection to the designated body on the date of reporting.

Signed on behalf of the designated body
